## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with M. David Paw on January 31, 2005.

The application has been amended as follows:

- a. In claim 21 : please replace the dependency of the claim from "22" to "20".

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

a. Claims 1 - 16 are allowable over the Prior Art of Record because it fails to teach or suggest a device for inspecting an eccentric bushing having interior and exterior surfaces, said device comprising an eccentric bushing disposed between the first holding device and the second and third holding devices, such that the first holding device is disposed against the interior surface of the eccentric bushing and such that the contact element and the second and third contact devices are disposed against the exterior surface of the eccentric bushing, whereby rotation of the eccentric bushing moves the contact element, which causes the display to provide readings showing changes in the distance between the interior and exterior surfaces of the eccentric bushing as the eccentric bushing is rotated in combination with the remaining limitations of the claims.

b. Claims 17 - 24 are allowable over the Prior Art of Record because it fails to teach or suggest a method of inspecting an eccentric bushing having interior and exterior surfaces, said method comprising the steps of positioning an eccentric bushing between the first roller and the second and third rollers, such that the first, second and third central axes are arranged in a triangular configuration, and such that the first roller is disposed against the interior surface of the eccentric bushing and such that the contact element and the second and third rollers are disposed against the exterior surface of the eccentric bushing, whereby rotation of the eccentric bushing moves the contact element, and measuring the movement of the contact element to provide a measure of the changes in

distance between the interior and exterior surfaces of the eccentric bushing as the eccentric bushing is rotated in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
